Supply & Distribution

- Total Supply: 1 Billion (1,000,000,000)
- Circulating Supply: 730 Million (730,000,000)

Upon launch, 27% of the token supply was locked for adaption and future exchange listings. This will provide assurances for stakeholders in an ever changing crypto market. To ensure the longevity of this project we can implement strategic plans to buy back tokens, burn or redistribute them accordingly.

With an astute business model, we can anticipate and react more efficiently to a constantly evolving crypto market. Initial liquidity will be locked for 12 months and reviewed every 3 months thereafter. We chose not to lock liquidity for an extended period as we intend to add further utilities indefinitely, this allows us to make changes to the contract if required.

Token Distribution

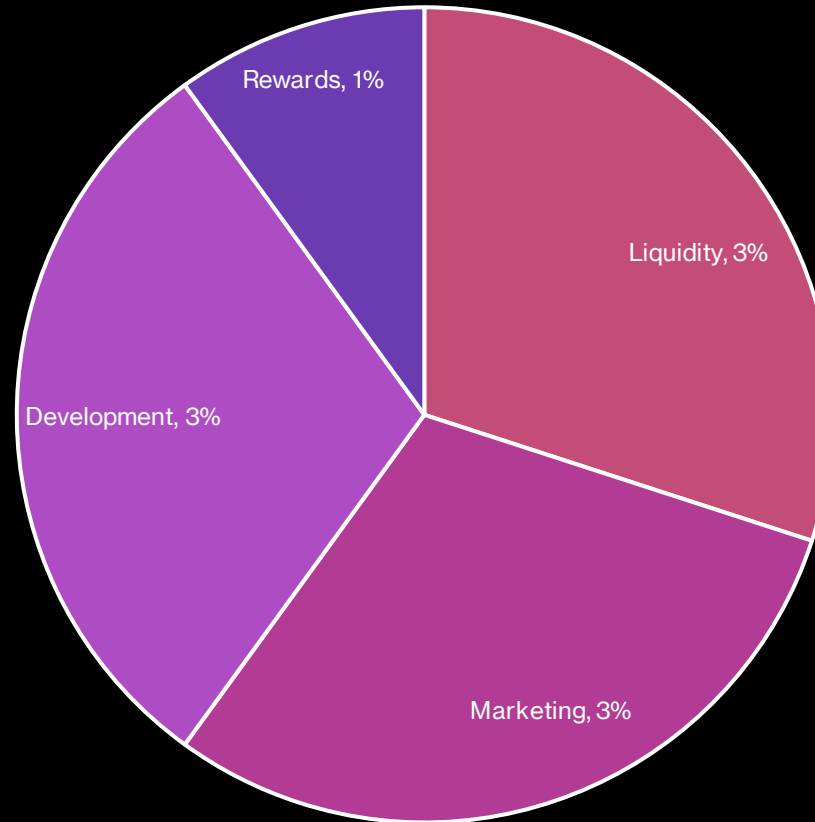

Buy & Sell Tax

We currently operate a 10% tax on both sale and purchase transactions, which goes towards the development of the project. Our main objective is to eventually drop the taxes to 0% for reputable CEX listings, such as crypto.com

Tax Distribution:

- 3% Liquidity
- 3% Development
- 3% Marketing
- 1% Rewards Pool
